

UCCESS IS YOUR!

If you will only follow our directions to the letter. Possibly they seem hard to follow, but if you will only try it for a week and note the profits you realize. Summer is now upon us, and every one should take some good blood purifier, kidney and liver regulator to prepare the system for the severe strains of the approaching warm weather. If this is not done, you are liable to attacks of the various diseases that are prevalent throughout the summer months. We would advise our agents to start out NOW and give every house in their section a visit, and use every effort possible to make a sale there. This will be easy enough if you have read the different suggestions we have been making in this department for the last few months. They are all good, and have been the foundation of some agent's success, and will be of value to you if you will only put them into practice. Business so far this year has been very gratifying, and shows conclusively that the people are using a remedy they know is good and will do all we claim for it, as well as that thousands of honest men and women are making a good living selling it. We are sorry to say that a few of our representatives are not selling as much medicine as they should. Possibly they may need a few words of encouragement. In our opinion the very best encouragement is to know that other people are getting on nicely at this business, and of course there is no reason why you

should not. We know a great many of you will be busy with your crops in a few weeks, but you should not let that keep you from your agency. Where can you find another business that requires so little capital, experience, and work for the large profits? We know you will say it is impossible to find one. We endeavor to make things as pleasant and easy for our representatives as possible, and if you should have any idea which you think would help your brother agent along, write us about it and we will gladly publish it in our department of this paper. In a few weeks we will begin to compile our Fall Almanac. This book will be the best we have yet issued, and we want new and attractive matter for it throughout. We want you to be on the lookout for good testimonials and forward them to the main office, so we will have a good lot to select. You should be careful to have the testimonials written in an explicit manner, giving full details of the case, the length of time the sufferer was afflicted, what other remedies he used and the result, the length of time it took "OUR NATIVE HERBS" to cure him, and last, but not least, be sure that the party testifying has been cured, and whenever possible procure his photograph. If you want to make good sales and large profits, you must think about your business and see what you can do

A Prosperous Ohio Agent's Experience.

The Alonzo O. Bliss Co.:

Gentlemen-It gives me pleasure to say that the popularity of "Our Native Herbs" is increasing daily, and I attribute this, in a great measure, to my following your advice and suggestions so carefully. My last six dozen order is nearly sold, so please ship another supply as soon as you receive this. I must have it here by Wednesday, as I have several orders to deliver on that day. I am giving Butler County a thorough canvassing, and am selling medicine at 90 per cent. of the places I visit. I always make it a point to be polite and gentlemanly. Whenever possible I see the lady of the house, tell her about "Our Native Herbs," and call her attention to some of the prominent people of her neighborhood who have been benefited by its use; show the guarantee, and explain the merits of the medicine in as few words as possible. In those cases where I do not effect a sale I am careful to ask the permission to call again, and when I make my second visit I am sure of success. My friends say I have the nicest rig in the county, and every one of them thinks "Our Native Herbs" the best medicine in the world. I want to give a short history of my career as agent for "Our Native Herbs." Three years ago I was confined to my bed with a severe case of rheumatism, and I was also a great sufferer from catarrh and dyspepsia. I tried several of our local doctors with no permanent benefits. Finally I turned my attention to pro-

prietary medicines, trying several widely-advertised remedies for my ailments, but still no cure. In the meantime my spirits were low and I had about given up all hope of a cure. My money was about all gone, and I was in a pitiable condition. Finally a friend sent me a box of "Our Native Herbs," with the request that I try it. I could feel an improvement in my condition after the first three days, and before the week was out I was much better. In two months from the time I first commenced to use "Our Na-

tive Herbs" I was a well man, and I have not had a single day's sickness since. I attribute my recovery and present good health to "Our Native Herbs." As soon as I was able I applied for the agency for my vicinity, devoting my spare time to the agency. I did not give much attention to the business for six or eight months, but shortly after that time people commenced to call at my home for a box, and acting upon a suggestion from you, I arranged my affairs so I could devote my entire time to the agency. I have now a business in Butler County that any man might be proud of. This employment suits me better than any other I ever had. The medicine gives satisfaction, and the people gladly recommend it to their friends. My sales are made among the rich, as well as poor, and in all cases it is used, not for its cheapness, but for its sterling curative properties as well. The only regret I have is that I did not start in this business and devote my whole time to it at first. I would be much better off to-day if I had done so. The various suggestions you make your agents through these columns are excellent, and the man or woman who wants to increase his income cannot do better than accept an agency for "Our Native Herbs," and if they follow the advice you give, success will crown their efforts. I find it is a great help to me to show the return cards, so people can see who is using the medicine. I am careful to distribute all of the literature you send, as it is attractive and goes a long way toward convincing the people that "Our Native Herbs" is

just the remedy they need. I have sold hundreds of boxes, and I have not heard of a single person who is not thoroughly satisfied with the benefits derived from the medicine. Its action is so quiet, with no unpleasant after effects, it is a pleasure to use it.

Yours, truly,

J. M. BASSETT.

We give herewith the statement of one of our representative agents, a man who thoroughly understands his work and takes pleasure in it. He has been engaged with us for years, and judging from present indications, he will figure largely in the contest for the County Prize. This gentleman held his agency for quite a while without making any special effort for new business, merely letting the agency take care of itself. Finally we wrote him about the size of the territory and the possibilities of his agency, calling his attention to the statements of our agents we were publishing in this department weekly. He grasped the situation at once, and ever since has been an energetic worker.

His example is worthy of imitation. Your territory can be made just as valuable as Mr. Bassett's if you will work it properly. You should not canvass a few hours and then expect to have everybody rush to you for medicine. An agency requires steady, conscientious work, and will yield handsomely for every hour of this character of work that is put upon it. One great trouble with the agent is, he thinks he can loaf a few hours each day and have no exacting employer after him about it, but when he comes to foot up his earnings at the end of the day's work, he will find they are far from what they should be. The agent should be careful to put in just as many hours when he is

working for himself as if he was engaged by the most exacting employer. Our successful agents are careful to see that one of our "Almanacs" is placed in every house in their territory, and if they are not able to make a sale there at the first visit, they continue to call until they have done so. Our Iowa agents report a great boom in that State. We understand they are making some good records. We hope to have the pleasure of publishing some of them in the near future. It has been the experience of all of our agents that a small territory closely and energetically worked pays much better than a larger one skimmed over.
